Summary — Passionate and highly skilled JavaScript Developer with strong expertise in React Native, React.js, Node.js, and full-stack development using the MERN stack. Proficient in building cross-platform mobile applications as well as scalable web solutions, with solid experience in state management using Redux and creating responsive, intuitive user interfaces. Adept in backend development with Node.js and Firebase, working with MongoDB for data management, and deploying applications on platforms like Vercel and Expo. A proactive team player who excels at solving complex development challenges and is eager to contribute to innovative projects while growing in a dynamic, tech-driven environment.

Skills

Frameworks React.js, Node.js, Express.js, React Native
Databases MongoDB, Firebase
Languages JavaScript

Other Redux-Toolkit, RESTful APIs, Git
Soft Skills Communication, Problem Solving, Attention-to-detail, Teamwork, Leadership

Experience

Code Rafters

August 2025 – Present

MERN Stack and React Native Developer

- Made app development faster by creating reusable UI components for the **Fena** and **Trauma** React Native apps.
- Built and connected REST APIs using **Node.js** to help the app and server share data smoothly.
- Improved backend speed by cleaning up database queries and reducing extra API calls.
- Used **Redux** and **React Context API** to manage app data easily and keep code organized, especially for the **Omen Boost** project (React + TypeScript).
- Worked with the team on design updates and code reviews to keep the apps clean, fast, and easy to maintain.

IIFA TECH

May 2024 – Nov 2024

Mern Stack Intern

- Streamlined development workflows, increasing coding efficiency through the creation of reusable UI components tailored to project requirements.
- Developed robust REST API endpoints using Node.js, ensuring efficient data handling and seamless integration..
- Improved backend performance by refining database queries, leading to a significant reduction in unnecessary calls.

Projects

Fena App (React Native)

- Developed core features and reusable UI components to streamline app development and maintain consistency across screens.
- Integrated REST APIs to ensure smooth communication between the app and backend services.
- Focused on performance optimization and responsive layouts for both Android and iOS platforms.
- **Skills:** React Native, REST APIs, UI Components, Responsive Design

Trauma App (React Native)

- Created a mobile app focusing on mental health and emotional support resources for users.
- Improved performance by refining API calls and implementing efficient state management.
- Worked on user-friendly interface designs and animations to enhance engagement.
- **Skills:** React Native, State Management, API Integration, UI/UX Design

OmenBoost (MERN Stack)

- Developed and maintained a full-stack web application for OmenBoost, a gaming account marketplace and boosting service platform, using the MERN stack.
- Implemented authentication and role-based access control (Admin, Seller, User) with JWT and Redux Persist for secure session management.
- Built dynamic dashboards for admins and sellers to manage user profiles, transactions, orders, and notifications in real time.
- Integrated payment gateways (Stripe) and live order tracking features to enhance user experience and operational efficiency.
- Optimized API performance, implemented email notification settings with Redux state management, and improved UI responsiveness using Tailwind CSS.
- **Skills:** React.js, Node.js, Express.js, MongoDB, Redux Toolkit, REST APIs, Stripe Integration, Authentication, Tailwind CSS

AutoConnect (React Native)

- Developed a cross-platform mobile application using React Native to connect car showrooms with individual sellers, enabling exclusive car listings viewable by showroom dealers.
- Implemented secure authentication and authorization workflows to ensure protected access and user role management.
- Integrated scalable navigation, responsive UI components, and seamless API communication for smooth user experience.
- **Skills: React Native, Redux toolkit, REST APIs**

AutoConnect (MERN stack)

- Developed a comprehensive platform for connecting car showrooms and sellers, allowing sellers to list cars exclusively visible to showroom dealers.
- Implemented robust authentication and authorization mechanisms to maintain secure access control.
- **Skills: React.js, Node.js, MongoDB, Authentication, Redux toolkit, Authorization, Dynamic Routing**

Sticky Notes (MERN Stack)

- Created a task management system inspired by Trello's Kanban board using React.js and MongoDB.
- Integrated CRUD operations for task management, allowing users to create, update, and move tasks between columns.
- Utilized React hooks for state management and optimized application performance.
- **Skills: React.js, MongoDB, CRUD Operations, Task Management, Performance Optimization**

Pinky Beauty Lounge (MERN Stack)

- Developed a task management system as part of the Pinky Beauty Lounge project at IIFA Tech, utilizing React.js and Firebase.
- Built an admin panel and dashboard for effective management and oversight of user activities and appointments.
- Integrated CRUD operations for task management, enabling users to create, update, and track their tasks efficiently.
- **Skills: React.js, CRUD Operations, Admin Panel Development, Performance Optimization**

Education

University Of Management Technology
BS Computer Science

CGPA: 3.23/4
