🏠 Muhammad-Waleed-Amir — 🌐 Portfolio 📄 Muhammad-Waleed-Amir

Summary — Passionate and highly skilled JavaScript Developer with strong expertise in React Native, React.js, Node.js, and full-stack development using the MERN stack. Proficient in building cross-platform mobile applications as well as scalable web solutions, with solid experience in state management using Redux and creating responsive, intuitive user interfaces. Adept in backend development with Node.js and Firebase, working with MongoDB for data management, and deploying applications on platforms like Vercel and Expo. A proactive team player who excels at solving complex development challenges and is eager to contribute to innovative projects while growing in a dynamic, tech-driven environment.

Skills

Frameworks	React.js, Node.js, Express.js, React Native	Other	Redux-Toolkit, RESTful APIs, JWT Auth, Socket.io, Git, GitHub
Databases	MongoDB, Firebase Firestore	Cloud/APIs	Firebase Auth/FCM, Google Maps API, RevenueCat, Payment Gateway Integration
Languages	JavaScript, Typescript	Soft Skills	Communication, Problem Solving, Attention-to-detail, Teamwork, Leadership
Mobile	iOS & Android Builds, Xcode, Android Studio, CocoaPods, Push Notifications, Play Store/App Store Deployment		

Experience

Code Rafters

August 2025 – Present

MERN Stack and React Native Developer

- Built reusable UI components for **Fena** and **Trauma** (React Native), speeding up feature development and cutting duplicate code across apps.
- Designed and integrated REST APIs using **Node.js** and **Express.js** for smooth client-server data flow across multiple production apps.
- Optimized backend performance by refactoring database queries and reducing redundant API calls, improving response times.
- Implemented **Redux Toolkit** and **React Context API** for scalable, organized state management in **OmenBoost** (React + TypeScript).
- Developed **chargeWise**, an EV charging station finder app, integrating **Google Maps/Places API** and resolving cross-platform (iOS/Android) build issues for a Bulgaria-based client.
- Collaborated with the team on design updates and code reviews to keep apps clean, fast, and maintainable.

IIFA TECH

May 2024 – Nov 2024

Mern Stack Intern

- Streamlined development workflows, increasing coding efficiency through the creation of reusable UI components tailored to project requirements.
- Developed robust REST API endpoints using Node.js, ensuring efficient data handling and seamless integration..
- Improved backend performance by refining database queries, leading to a significant reduction in unnecessary calls.

Projects

NamazCLOCK (React Native)

- Developed **namazCLOCK**, a prayer times app with a core **App Lock** feature that restricts phone usage during Salah timings to reduce distraction and encourage mindful prayer.
- Architected a dual local + server notification system using **Notifee** (local scheduling) and **Firebase Cloud Messaging (FCM)** (server-triggered alerts) to guarantee reliable, on-time prayer notifications even offline.
- Integrated **Firebase Authentication** and **Firestore** for user accounts and real-time data sync, using Firebase as the sole backend.
- Designed and refined professional dark and light theme systems across multiple iterations, using near-neutral backgrounds with color confined to accent/primary elements for a polished, accessible UI.
- Integrated **RevenueCat** for subscription management, building a pricing screen with dynamic weekly price breakdown calculations for premium features.
- Resolved CocoaPods and Firebase Swift interop build issues (module map/header conflicts) to stabilize the iOS build pipeline.
- Prepared and configured the app for release on the **Google Play Store**, including closed testing setup.
- **Skills:** React Native, Firebase (Auth, Firestore, FCM), Notifee, RevenueCat, iOS/Android Build Configuration, UI/UX Theming, Subscription Management

Fena (React Native)

- Developed **Fena**, a menstrual cycle and flow tracking app built with **React Native**, enabling users to log and monitor menstrual health data.
- Built subscription-based premium features with tiered access, supporting multi-language legal/subscription terms (German & English) for EU market compliance.
- Created reusable UI components to maintain consistent design across tracking, calendar, and insights screens.
- **Skills: React Native, Subscription Management, Multi-language Support, UI Component Architecture**

Trauma (React Native)

- Developed **Trauma**, a paid subscription app for trauma recovery, providing users live therapy sessions and a library of recorded video content.
- Implemented subscription/paywall logic to gate access to live sessions and recorded content based on membership tier.
- Built reusable UI components for session scheduling, video playback, and content browsing screens.
- **Skills: React Native, Subscription/Paywall Logic, Video Integration, UI Components**

OmenBoost (MERN Stack)

- Developed **OmenBoost**, a marketplace app for buying and selling games, using **React** and **TypeScript**.
- Implemented **Redux Toolkit** and **React Context API** for scalable state management across listing, cart, and transaction flows.
- Built game listing, search/filtering, and secure purchase flow features.
- **Skills: React, TypeScript, Redux Toolkit, Context API, E-commerce Flow**

Pegnify (React Native)

- Developed **Pegnify**, a platform connecting marketers and producers, using **React Native**.
- Built a real-time in-app chat feature enabling direct communication between marketers and producers.
- Designed user flows for producer-marketer discovery and collaboration.
- **Skills: React Native, Real-time Chat, REST APIs, UI/UX**

2min4self (React Native)

- Developed **2min4self**, a brain health exercise app with **React Native**, delivering short daily brain-training exercises.
- Implemented push notifications to remind users of daily exercise routines and boost engagement.
- Built reusable UI components for exercise sessions, progress tracking, and reminders.
- **Skills: React Native, Push Notifications, UI Components, User Engagement**

Wishbox (React Native)

- Developed **Wishbox**, a children's wishlist app where kids create wishlists visible to parents, guardians, and relatives who can fulfill them.
- Built a permission-based sharing system allowing family/relatives to view and reserve wishlist items.
- Designed a child-friendly UI alongside a parent/guardian dashboard for wishlist management.
- **Skills: React Native, Sharing/Permissions System, REST APIs, UI/UX**

AutoConnect (React Native)

- Developed a cross-platform mobile application using React Native to connect car showrooms with individual sellers, enabling exclusive car listings viewable by showroom dealers.
- Implemented secure authentication and authorization workflows to ensure protected access and user role management.
- Integrated scalable navigation, responsive UI components, and seamless API communication for smooth user experience.
- **Skills: React Native, Redux Toolkit, REST APIs**

AutoConnect (MERN Stack)

- Developed a comprehensive platform for connecting car showrooms and sellers, allowing sellers to list cars exclusively visible to showroom dealers.
- Implemented robust authentication and authorization mechanisms to maintain secure access control.
- **Skills: React.js, Node.js, MongoDB, Authentication & Authorization, Redux Toolkit, Dynamic Routing**

Sticky Notes (MERN Stack)

- Created a task management system inspired by Trello's Kanban board using React.js and MongoDB.
- Integrated CRUD operations for task management, allowing users to create, update, and move tasks between columns.
- Utilized React hooks for state management and optimized application performance.
- **Skills: React.js, MongoDB, CRUD Operations, Task Management, Performance Optimization**

Pinky Beauty Lounge (MERN Stack)

- Developed a task management system as part of the Pinky Beauty Lounge project at IIFA Tech, utilizing React.js and Firebase.
- Built an admin panel and dashboard for effective management and oversight of user activities and appointments.
- Integrated CRUD operations for task management, enabling users to create, update, and track their tasks efficiently.
- **Skills: React.js, CRUD Operations, Admin Panel Development, Performance Optimization**
